Expertise

- Web Development: Ruby on Rails, React, Node.js
- Databases: PostgreSQL, MySQL
- AI & Data: TensorFlow, PyTorch, NLP
- DevOps / Tools: Docker, Git, CI/CD, Render
- Methodologies: Agile, Scrum, TDD, Clean Code

Tools

VS Code, Postman, Docker
GitHub, Clickup / Jira / Visual studio code

Language

- Malagasy
- French
- English: Professional

Education

ESTI Antanimena 2020-2023

Bachelor's Degree in Computer Development

Professional Experience

INGEDATA, Antananarivo

2021 – Mars 2025

Ruby on Rails Developer & Web/Automation Tester

- Developed microservices to improve application performance (Talent, Candidate, Recruitment, etc.)
- Implemented back-end solutions and collaborated closely with the **front-end** team
- Performed technical, functional, and **automation testing** using **RSpec, Cypress**, etc.
- Interacted with end-users to gather feedback and enhance application usability and features
- Participated in **Agile** team meetings: daily stand-ups, backlog reviews, retrospectives, and sprint planning

Technical Environment: Ruby on Rails, Svelte, PostgreSQL, TDD, RSpec, Cypress, RESTful APIs

- Implemented custom **scripts** to filter, process, and structure company project data from APIs
- Developed useful features based on user needs and feedback

Technical Environment : Google apps script, javascript, APIs, CSS

Personal Project – B-Mray (VitaCar)

Fullstack Web Application with Microservices & AI

- **Back-end** development (Rails, microservices)
- **front-end** development (React)
- Integrated **Python for AI** and sales **prediction**, including automated testing
- Key features: sales, accounting, client portal, **analytics** dashboard, sales forecasting
